SUMMARY

I'm a Software Engineer with 6+ years of professional experience in the design, architecture and development of many Software Applications. I have a strong passion for solving problems and building products and solutions through the application of technology.

WORK EXPERIENCE

2016–present **TECHNICAL PRODUCT OWNER** – *smava GmbH*

- ✓ Started as a Backend Engineer and was involved in developing many Product Solutions for Marketing, CRM, Customer Facing Application etc.
- ✓ Was later promoted to lead a team of 6 Backend Engineers.
- ✓ As a Team Lead, the main focuses were to make tech decisions, mentor other developers, design and architect various software components and hire new Engineers.
- ✓ I'm currently refactoring smava's Legacy Monolithic applications into Scalable Microservices.

2015 – 2016 **IT CONTRACTOR** – *Deutsche Telekom AG*

- ✓ Lead the development / support of a 4 year old telecom project named HCS-RCS (configuring handsets to use Message+ Application).
- ✓ Worked closely with Product Owner following Agile / Scrum based development.

2013 – 2015 **SYSTEMS ENGINEER** – *Infosys Ltd.*

- ✓ Provided Software Services by performing end to end development like analysis, design and implementation of user stories including unit and integration testing.

2012 – 2013 **INTERN PROGRAMMER** – *Aplopio Technology*

- ✓ Involved in the development of the recruiting software - Recruiterbox (recruiterbox.com).
